Experience

Freelance Software Developer

Jun 2024 – Present

Full Stack Developer (End-to-End Project Delivery)

Remote

- Delivered multiple **full-scale products** independently, handling **frontend, backend, deployment, and maintenance**.
- **Innuz RMS:** Built a comprehensive **restaurant management system** including a web portal, POS desktop app, and mobile app for dine-in, takeaway, and online orders. Integrated **real-time communication with WebSockets**, role-based access control, inventory management, and Bluetooth/USB thermal printing.
- **Ruvo Services USA:** Developed a complete **service marketplace platform** like Urban Company with:
 - * A **Next.js website** for service booking and payments.
 - * A **React Native provider app** for service management and real-time notifications.
 - * **WebSockets** for live updates between customers, providers, and admins.
 - * Cloud deployment using **NGINX and VPS hosting**.
- Deployed and maintained applications on production servers, ensuring high availability, performance, and scalability.

National Payments Corporation Of India

Jan 2023 – Jun 2024

Graduate Engineer Trainee, BHIM Product Management

Mumbai, Maharashtra

- Worked extensively on **data analysis, product development, and user engagement initiatives** to enhance the BHIM platform.
- Developed and executed **SQL queries in Apache Superset** to extract key business insights, process large datasets, and generate reports on **user retention, engagement, and transaction trends**.
- **Tap & Pay Feature:**
 - * Built a **React Native mobile application** to enable **NFC-based card transactions**, allowing users to tap their **debit/credit cards** on mobile devices to initiate payments.
 - * Integrated **NFC card reading functionality** and processed encrypted data using specialized techniques derived from **Visa, RuPay, and other payment network documentation**.
- **Contests & Reward Programs:**
 - * Led the execution of BHIM's **high-transaction contests**, ensuring seamless **data validation, fraud detection, and report generation**.
 - * Collaborated with the **marketing team** to create and send **personalized mobile notifications** with engaging creatives.
 - * Monitored **daily transaction data**, analyzed trends, and assessed the contest's impact on user behavior.
 - * Managed the **end-to-end reward distribution process**, ensuring compliance with validation checks before sending incentives to winners.
- **Global Fintech Fest (GFF) 2023:**
 - * Conducted **rapid testing** of new BHIM features, including **Tap & Pay**, across multiple **Android and iPhone devices** to ensure seamless functionality before release.
 - * Identified and reported critical issues, contributing to **bug fixes and feature optimizations** for the BHIM app's public rollout.

Projects

Ruvo Services USA | *Next.js, React Native, Node.js, MongoDB, WebSockets*

Jul 2025 - Present

- Built a **complete service marketplace platform** similar to **Urban Company** for USA clients.
- Developed a **customer-facing website** using Next.js for service booking, user registration, and payments.
- Built an **admin portal** in Next.js for managing services, users, providers, and transactions.
- Created a **React Native mobile app** for service providers to manage bookings, update statuses, and receive real-time notifications.
- Implemented **real-time communication** using **WebSockets** for live updates between customers, providers, and admins.
- Integrated role-based access control, payment gateway, and notification system for seamless operations.
- Deployed on **cloud servers** using NGINX, VPS hosting, and ensured scalability for a growing user base.

Innuz RMS | *JavaScript & Frameworks, Web Sockets, Kotlin, Ktor, Electron.js*

June 2024 - Present

- Freelancing project: Built a **full-scale restaurant management system** for dine-in, takeaway, and online orders.
- Designed and implemented the **web application** using **React.js, Node.js, and Socket.io** for real-time order processing.
- Created a **desktop application** with **Electron.js** for seamless POS (Point of Sale) operations.
- Built a **mobile application** using **React Native** for restaurant staff to manage orders efficiently.
- Integrated **Bluetooth and USB thermal printing** for order receipts and kitchen ticketing.
- Implemented **role-based access control** for restaurant owners, managers, and staff.
- Developed an **inventory management system** to track stock levels, ingredient usage, and wastage.
- Built **detailed reporting and analytics** features, including sales trends, daily/weekly stats, and user engagement.
- Integrated a **multiplayer game module** to engage customers.
- Deployed on **cloud servers** using **NGINX, VPS hosting, and domain management**.

Tap and Pay Feature for BHIM | *React Native, Android Studio*

May 2023

- Developed a **Tap and Pay** feature for the BHIM app, enabling contactless reading of data from **NFC-enabled debit and credit cards**.
- Built a **React Native mobile application** that reads card data when tapped and securely interprets the data.
- Extracted card information using **APDU commands** based on documentation from **Visa, RuPay, and other payment networks**.
- Conducted extensive research on **security protocols and data extraction methods** to ensure safe and efficient data handling.

Technical Skills

Languages: JavaScript, HTML/CSS, SQL, NoSQL

Developer Tools: VS Code, Git, Postman

Technologies/Frameworks: ReactJS, NodeJS, NextJS, ReactNative, MongoDB, WebSockets, NGINX, ElectronJS, Linux, WordPress, Wix

Extracurricular

- **Video Editing:** Experienced in creating and editing videos for promotional and instructional content. Skilled in **Adobe Premiere Pro, Luma Fusion, and InShot**.
- **Photo Editing:** Proficient in **Adobe Photoshop** and **Lightroom** for social media and advertisements.
- **Content Creation:** Skilled in **Canva, Photoshop**, and marketing content for brand growth.
